## SUMMARY OF QUALIFICATIONS

**Software engineer focused on developing with NodeJS, ReactJs and React-Native as well as developing new developers**

## PROFESSIONAL EXPERIENCE

### **2023 - Present | Amaris Consulting**

IT Consulting

Front-end Engineer

- Working as main front-end developer for the Sodexo client, where I develop interfaces with Technologies such as NextJs, ReactJs, SASS, CSS-IN-JS and GraphQL. I became one of the main developers of the homepage of the site in addition to implementing improvements in the user experience;

### **2022 - 2023 | Baires Dev**

Front-end Engineer

- In my time since joining the BairesDev team I have worked on the Myriad Genetics client as a front-end developer. In this project I had the opportunity to work with Typescript, ReactJs, GraphQL and Python in two projects, one aimed at the company's patients and another aimed at the doctors who used the company's products

### **2021 - 2022 | Mevo Health**

Front-end Engineer

- At Mevo Health I worked as a front-end leader managing the front-end team for two of the company's main products. In addition, together with the product staff, I carried out research and tests to implement improvements in the user experience of our users. I was responsible for implementing the startup's first A/B tests(using Google Optimize) on products that deal with sensitive users, thus increasing the purchase conversion at the company's store.  
Technologies used: Typescript, ReactJs, NextJs, Google Optimize, AWS;

### **2021 - 2021 | 5A Attiva**

Full-Stack Engineer

- As a full-stack developer at 5A Attiva I worked at the client TORO Investimentos where I took care of the fraud assessment sector using technologies such as NestJS and ReactJs;

### **2020 - 2020 | Tecla T**

Full-Stack Engineer

- I acted as a technical leader managing a team of 10 developers who worked on 5 different projects for the software factory. In addition to management, I also developed a wide range of projects for several of the company's clients. Projects developed with NodeJs, ReactJs, React-Native and deployed on heroku;

### **2018 - 2020 | Helicidade heliport**

Full-Stack Engineer & Technical leader

1. Technical manager of the heliport management application. I took care from the design of the application to development and testing. Application developed with Typescrip, NodeJs, ReactJs and React-Native;

# Alexandre Nascimento
